

INSI DATA CENTER FACTS

INSI offers secure, state-of-the-art facilities for locating mission critical communications equipment and applications. INSI collocation provides access to advanced high-capacity fiber optic networks, which can support your data, video and voice applications.

Facilities Designed For Your Business

- ❖ Customized collocation space and equipment configuration appropriate for your business.
- ❖ Available facilities and expansive bandwidth to accommodate your needs and growth.

Access To Your Customers

- ❖ High Capacity: Expansive bandwidth to meet your growing needs. Can accommodate DS-1, DS-3, and OC3 – OC192.
- ❖ Accessibility: Establish a "virtual presence" throughout the network – and close to your customers.
- ❖ Interconnect: Connect to major carrier locations and major ISP's, Incumbent Local Exchange Carrier (ILEC) tandem, end offices and commercial districts.

INSI Provides Security Management and Monitoring Services for Voice and Systems Management

- ❖ Redundancy: Critical communications are protected by self-healing SONET Networks.
- ❖ Reliability: INSI provides 24x7 monitoring of network services.
- ❖ INSI is a Managed Service Provider

Key Benefits:

Security: Card Key Access

Fire Protection: State-of-the-art FM 200 pre-action fire protection system utilizes gas to extinguish fire. Additional back-up is provided by dry pipe pre-action overhead sprinkler systems.

HVAC: Redundant HVAC (Heating, Ventilation and Air Conditioning) is standard at each collocate facility. Space is built to accommodate additional units as needed.

UPS Systems: Uninterrupted Power Supply system automatically activates to ensure continuous power to equipment in the event of an outage.

Emergency Battery Backup Power: Includes AC and DC systems to meet your individual equipment requirements.

Generators: Equipped with a 1-megawatt standby generator.

Seismic Features: Constructed to meet California Earthquake Zone 4 seismic requirements.

Technical Assistance: Assistance is available 24 x 7.
